

Sharp Edges and Corners

*All items shown on these pages are for example only. Their appearance here does not constitute an endorsement by Anoka County or any of its representatives.

Protective padding is available to wrap around dining room, coffee or end tables to help protect tots from the sharp corners and hard edges. There are also four padded inserts that fit into the corners for extra cushioning. They should be non-toxic, flame retardant materials.

These soft foam cushions can be cut to size and attached with double-sided adhesive.

Hearth guards are also available. They are made with fireproof padding so you won't have to remove it when you use your fireplace. It easily installs with Velcro® pads to most brick, stone, marble and slate hearths up to 11" wide, and 18" on the sides.
