

PUBLIC NOTICE: The Brown County Highway Department will be applying herbicide to the right-of-way of County roads to control the growth of noxious weeds. **The chemicals used require the treated road ditch not be cut for hay for 14 days. Call the Highway Department to find out when a road ditch has been treated. The hay from the treated road ditch will pass through an animal causing the manure to injure broadleaf plants wherever it is spread the next year.** Anyone wishes NOT to have a specific road ditch sprayed needs to complete a Non Spray Application which can be obtained by contacting the Brown County Highway Department at 507-233-5700, or printing and completing the form off the Brown County Web site: <https://www.co.brown.mn.us/forms-permits>. Return form to Brown County Highway Dept. by May 15, 2024. When landowners/renters do not respond, we will assume it is acceptable to spray.
